CONTACT US FOR CUSTOM SIZE SHOWER SCREEN

WALL TO WALL SHOWER SCREEN

To make a shower screen like the photo on the right, you need to measure the size (N) between the wall AFTER tile. Then you can choose different size from each panel on the table above to suit your size. **BUT remember to deduct 10mm gap for hinge or bracket from wall to wall size.**

Example	1500mm between wall after tile, i.e. N = 1500mm
	Deduct 10mm gap for hinges and bracket, i.e. $1500 - 10 = 1490\text{mm}$ (1490mm is the total size of each panel)
	So we can use 580mm Door(panel A) + 470mm (panel B) + 440mm (panel C)
	OR use 650mm Door(panel A) + 400mm (panel B) + 440mm (panel C)

Note: Door will hinge on 470mm panel or 400mm panel on this case. You can use only two panel if the size of two panels can add up to the size between two walls (panel A + C or panel B + C) Door can only attach to panel B or straight wall.

SQUARE SHOWER SCREEN

To make a shower screen like the photo on the right, you need to measure the size from wall to outside of the glass of both side AFTER tile, the door side (X) and the panel C (Y). Then you can choose different size for panel A,B and C according to the photo. **BUT you need to deduct 20mm from the door side for gap and thickness of the glass.** You can swap the position of panel C and panel A+B to suit your bathroom.

Example	970mm X 750mm Square shower screen and Door at 970mm side, i.e. X = 970mm and Y = 750mm. Deduct 20mm from door side, i.e. $970 - 20 = 950\text{mm}$ (950mm is the total size for panel A & B). 750mm is the size for panel C.
	So we can use 650mm Door (panel A) + 300mm (panel B) + 750mm (panel C)

If you can not find the perfect fit for your bathroom we still can CUSTOM MADE one or two panel for special sizes, email your plan to renovation.d@gmail.com for quote
